Essentials for Water Quality Applications

EPG Companies Inc. has provided pumping systems and pollution control equipment for over 30 years.

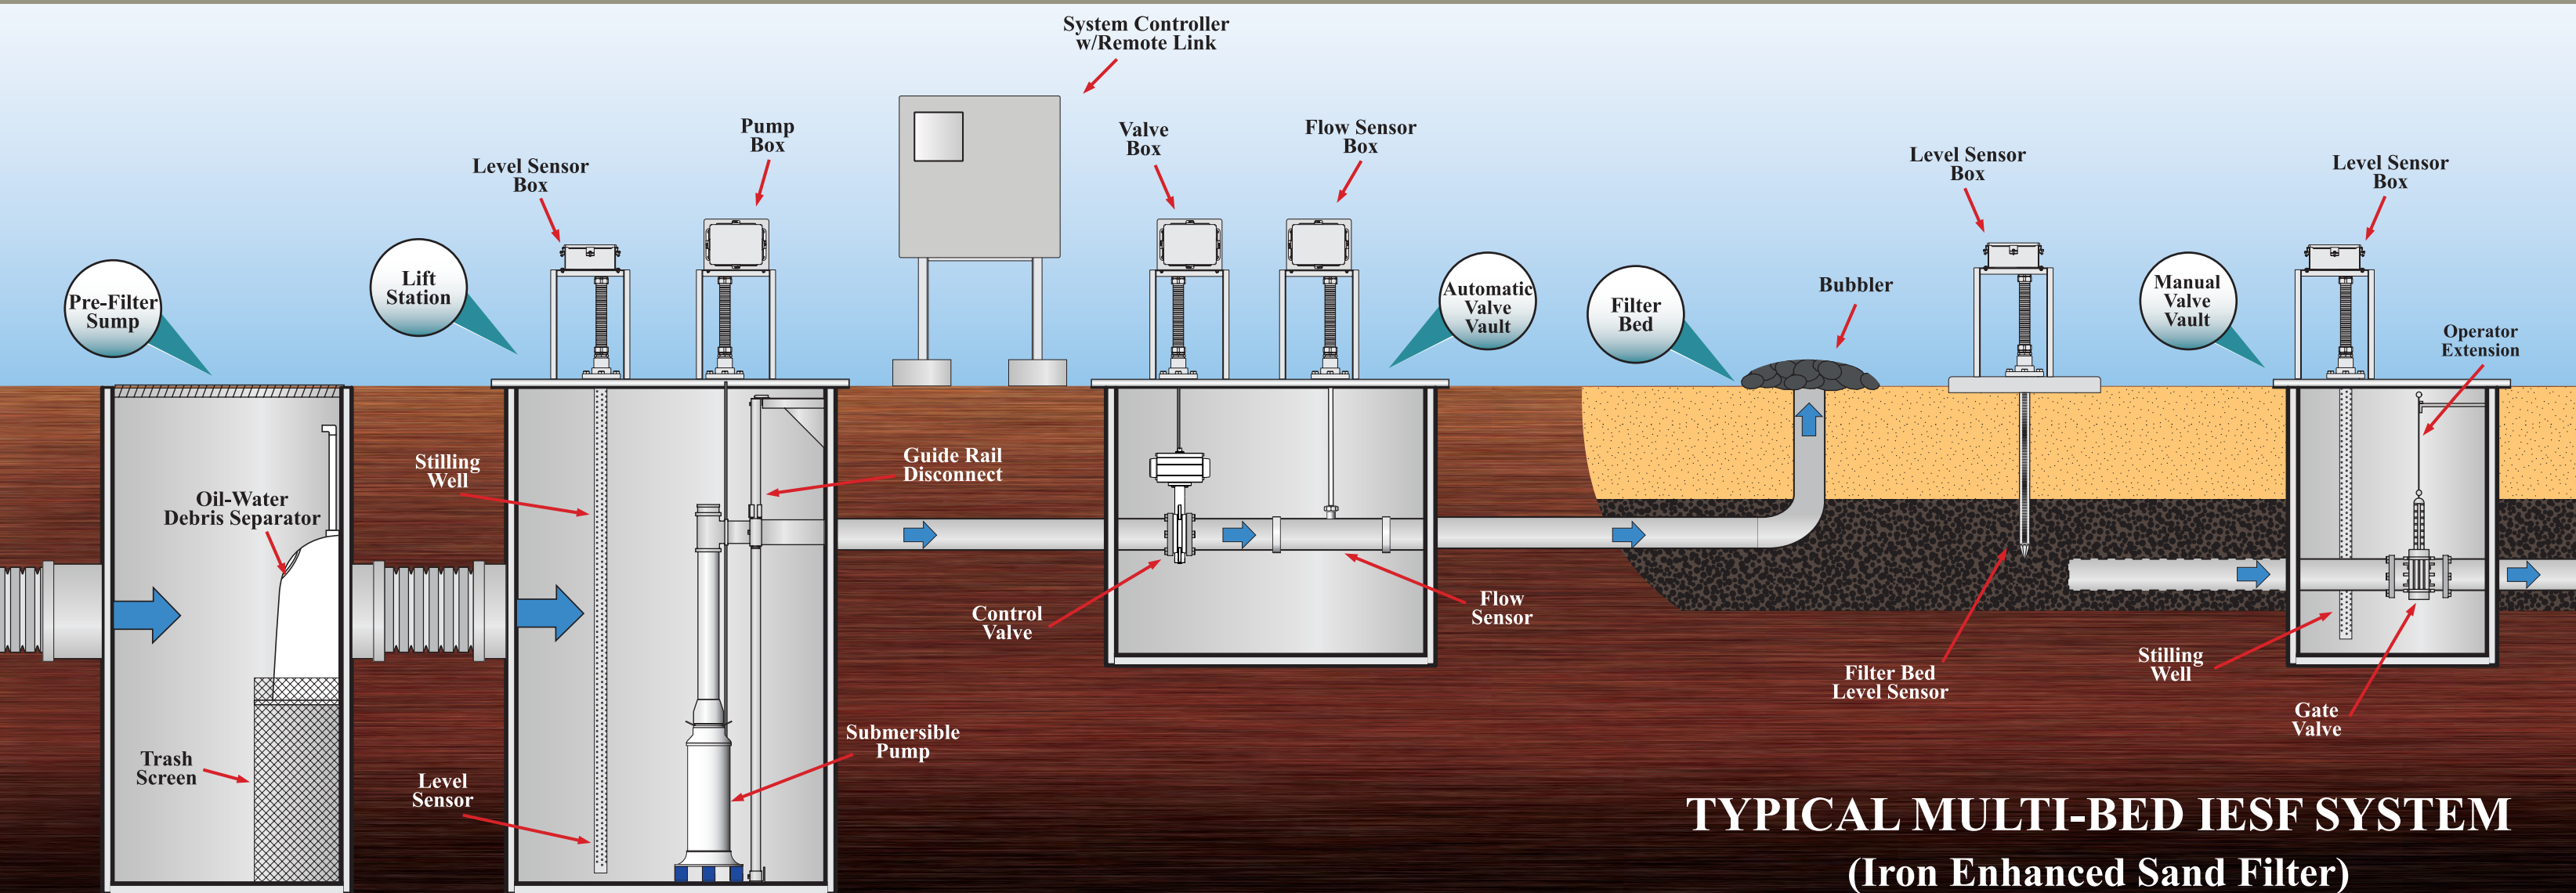

Through our years of design, engineering and manufacturing expertise, field knowledge, and extensive partnering with thousands of professionals, we have provided safe, cost-effective solutions that are now being recognized as essential system components for achieving optimal pump performance.

EPG Companies Inc. has been designing and supplying pumps, sensors, and controls for innovative surface water treatment & flood control solutions for years. We have applied our expertise & experience to help provide superior Iron-Enhanced Sand Filter Systems such as the one illustrated below.

The Iron-Enhanced Sand Filter system is designed to reduce phosphorous levels and improve water quality in lakes, ponds, and streams. The results help protect drinking water sources, enhance and restore wetlands and wildlife habitat, thus improving quality of life issues for residents. This system may also be part of a larger effort to assist in storm water management for neighboring communities.

EPG Companies Inc. - Finding solutions to unique problems for over 30 years!

EPG systems depend on high quality components which is why we manufacture and employ the best available:

Our AF Series pump offers axial-flow lift for smooth, low vibration, low pressure operation.

EPG's NW Series Disconnect Adapters are designed for easy and safe pump connection and removal.

EPG's UL controls insure safe operation for both operators and equipment.

EPG Junction Boxes specially designed for each process help simplify maintenance and extend component life.

EPG is a distributor for the following manufacturers:

Tsurumi: Manufactures submersible effluent drainage pumps.

Best Management Products: Manufacturer of the Snout® oil-water debris separator.

Valterra Valves: Manufacturer of manual gate valves.

RS Corcoran: Manufactures corrosion-resistant centrifugal pumps for the chemical processing and pollution control industries.

For over 30 years, EPG equipment has proven to be reliable, have long life and trouble-free service. EPG's knowledgeable engineering and applications specialists provide the after-sale support that any system may need.

To speak with an EPG applications specialist or to find out who to contact in your area, please call us at 1-800-443-7426 or email to info@epgco.com. We'll be happy to answer any questions you may have.
